

## **SOFTMATION INNOVATION LLP**

**Softmation Corporation** is leading organization established since 2012 and our new venture as a startup named **Softmation Innovation LLP** is working on Healthcare industry. In view of the problem in health, we have to solve the problem from rural to urban world about what happens due to lack of medical attention and we are trying our best in that direction. We are making a health machine, which will bring a security feeling that we will get medicine with consultation everywhere. It will bring a huge revolution in health sectors and entire world will want use this service for health improvement. We are solving the problem in Health Sector from rural to urban world. Through our Digital Technologies we are trying to give more medical attention to rural as well as urban people. As we have seen in last 2 years at the time of Pandemic Situation the public not able to get in touch with doctor for even normal diseases also. There are no proper consultation or Checkup facilities (like BP, Pulse, Temperature, Weight, ECG etc.) available for rural people so we are trying our best in that direction.

The company is in MVP stage for the incubated business idea.
